

At the root of this issue is freedom of choice. I choose to tune out AM and FM due to their constant barrage of nonsense commercials and repetitive content. I choose to subscribe to Sirius and XM because I believe that the service that both of the SDARS services are worth my hard earned money. I believe that traditional AM and FM radio are afraid of losing listeners. AM and FM should be, but keeping in mind that they have had 100 year head start over Satellite Radio. The AM and FM establishments complaint is with out merit and I urge the FCC to dismiss their complaint. Please don't limit where American choose to receive their entertainment and news.
